

GLOBAL GASES GROUP

In collaboration with

VERGINIA SRL

DELIVERING EXCELLENCE

Partnering with Global Gases Group since 2025, VERGINIA SRL is the go-to supplier of premium Liquid Helium in Romania and the Republic of Moldova, specializing in healthcare solutions for MRI and NMR operators.

As with all our business operations, we focus on providing a complete service package by delivering the required products with minimum notice at the time and place requested by our customer. On time every time.

MRI Helium

Our MRI service includes the flexibility to supply Liquid Helium in dewars of various sizes (400, 250 & 100 litres capacity). We can also offer pressure raising Helium gas cylinders and all necessary transfer equipment to deliver a reliable total cryogen supply service and help avoid unplanned downtime.

Dewar Features and Associated Equipment

- Dewar design featuring rugged construction and super insulation to reduce boil-off.
- All dewars mounted on bases with castors for easy handling.
- Stainless steel dewar construction provides safe use in high magnetic-field areas.
- Designed to be shipped by passenger aircraft as required.
- All dewars are labelled with information on safe handling of product, operation and storage.
- Dewars include an electrical pressurization system with the option of using external gas as and when required.
- The supply of product transfer lines, stingers, drive gas cylinders and qualified engineers to support MRI fill operations.

Global Gases Group's core objective is to safely and consistently deliver quality products on time to guarantee customer satisfaction by:

- Exploring every aspect of customers' requirements with personalized interactions and complete transparency.
- Our team's active engagement in overseeing daily operations to constantly enhance processes, control costs, and maintain top-notch quality.

The Global Gases Group looks forward to the privilege of serving your business needs for many years to come.
